General Motors Upfitter Integration

UI Bulletin #114c

Subject: Winter Cover Usage For Vehicles Equipped With Diesel Engine

Models: Chevrolet Express
GMC Savana

Model Years: 2011 and beyond

Date: February 20, 2014

Revision Date: March 1, 2017

ADVISORY

This bulletin was revised to add an addition cover part number

Condition:

Winter Cover Usage on vehicles operated in Cold Weather or Heavy Seasonal Snow Climates.

Recommendation:

To both reduce the potential of snow ingestion into the engine air intake system and to enhance heater performance in extremely cold conditions, General Motors recommends the use of a winter (front grill) cover.

Upfitted vehicles destined for usage in these climate areas should have a winter cover supplied if not provided from the manufacturer.

Part Information:

Use of the following General Motors Winter Covers (for the Express/Savana models) or equivalent is recommended.

- P/N 20945968 (2011-2016)
- P/N 84174729 (2017 and above)

Refer to the Chevrolet/GMC Duramax Diesel Owner's Manual Supplement for more usage information and installation instructions.

Disclaimer: GM Upfitter Integration Technical Bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service and/or modification of a vehicle. These properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. Contact GM Upfitter Integration for information on whether the information is applicable your vehicle.
